Leading Digital Print Company, D3Synergy, LLC Receives FSC Certification from the Forest Stewardship Council

MARLBOROUGH, MA, – D3Synergy, LLC., an industry leader in the marketing communications, digital print, offset and creative graphics arena, announces today that the company has received the coveted FSC (Forest Stewardship Council) Certification. This certification entitles D3Synergy to use the FSC logo on all printed materials produced in their Marlborough, MA facility to signify their compliance with FSC standards.

FSC, a non-governmental, non-profit organization, was established in 1993 to promote responsible management of the world's forests and support corporate responsibilities in conducting environmentally conscious operations. The FSC organization brings people and business communities together to improve forestry processes and reduce global deforestation.

As an FSC certified digital printer, D3Synergy adheres to a stringent series of operative principles to ensure their resources derive from well managed forests. This certification demonstrates D3Synergy's continued support of verifiable forestry practices and their commitment to providing high quality, eco-friendly solutions for customers.

"Our FSC certification further demonstrates our commitment to customer-focused operations. As a chosen print provider, we owe it to our customers to operate intelligently, efficiently and with the greatest respect for our environment," says Ralph DeMonico, President of D3Synergy. "I am proud to participate in this highly respected and environmentally progressive FSC certification program."
